

The lives of sisters, mothers, wives and daughters are at the very heart of our urgent need.

When it comes to breast cancer diagnoses, any delays can be life threatening. Our state-of-the-art Breast Care Center has enabled patients to thrive by providing a welcoming and comfortable place for the most advanced breast cancer detection and diagnostic services in the region. But our success has come at a cost. The high demand for our services means that some patients may have to wait up to 4-6 weeks to receive diagnostic imaging, creating an urgent need to serve more people, more efficiently.

Our goal is to significantly increase the number of patients we serve and significantly decrease wait times by providing the necessary infrastructure and equipment to screen patients faster.

2

MINUTES

is the time between each diagnosis of breast cancer in the U.S.

55

PERCENT

of Seton Breast Care Center patients were under- and/or un-insured.

4-6

WEEKS

is the current wait time to receive a diagnostic mammogram.

FUNDING PRIORITIES

Grow our services and increase our capacity to see more patients without long wait periods.

Expand the existing build-out of the Breast Care Center to accommodate more people and equipment.

Acquire additional state-of-the-art technology and equipment.
