

Our leadership in neurosciences care is guided by visionary aspirations.

As one of the first two hospitals in the entire state of Texas to receive Primary Stroke Certification from The Joint Commission, Dell Seton has led the way in stroke care throughout Central Texas. In 2019, Dell Seton treated 688 patients in its Comprehensive Stroke Center—the highest stroke center designation available. In keeping with our history of excellence, Dell Seton Neurosciences will provide the highest level of clinical neuroscience expertise in Central Texas by attracting and retaining renown physicians, and allocating resources to ensure that Austin has a world-class neurosciences program. Through innovation and ever-evolving technology, we will provide access to advanced navigation systems specific to the neuro fields, including brain and spine and epilepsy, to create a full continuum of care. We will provide access to cutting-edge treatments through a commitment to clinical research, and will train neuroscience leaders of tomorrow. Dell Seton will lead the way in advancing the caliber of neuroscience care here at home.

12%

expected increase in stroke patients by 2024.

9.6%

expected increase in epilepsy patients over the next 5 years.

40 SECONDS

is the amount of time between strokes in the U.S.**

**According to the American Heart Association.

FUNDING PRIORITIES

Provide the most advanced technology in neurosciences care.

Support the highest Level 4 Epilepsy Monitoring Unit.

Continue to conduct stroke research and provide Comprehensive Stroke Service.

Increase available operating rooms to meet growth in neurosurgery.

Provide Brain and Spine Services, including tumor research.
